

# CSE3011 NETWORK PROGRAMMING

## LAB EXPERIMENT 10

NAME – B PRATYUSH

REGISTRATION NUMBER – 19BCN7114

FACULTY – PROF. MUNEESWARI

**Experiment Description: UDP Client Server Communication program using Datagram**

### **CODE:**

#### **udpClient.java**

```
import java.util.*;
import java.io.IOException;
import java.net.DatagramPacket;
import java.net.DatagramSocket;
import java.net.InetAddress;
public class udpClient {

    public static void main(String[] args) throws IOException {

        Scanner sc = new Scanner(System.in);
        DatagramSocket ds = new DatagramSocket();
        InetAddress ip = InetAddress.getLocalHost();
        byte buf[] = null;
        while (true)
        {
```

```

        String inp = sc.nextLine();
        buf = inp.getBytes();
        DatagramPacket DpSend = new DatagramPacket(buf, buf.length,
ip, 1234);

        ds.send(DpSend);
        // break the loop if user enters "bye" if (inp.equals("bye"))
        break;
    }
    sc.close();
    ds.close();
}

}

```

## **udpServer.java**

```

import java.io.IOException;
import java.net.DatagramPacket;
import java.net.DatagramSocket;
import java.util.*;

public class udpServer {

    public static void main(String[] args) throws IOException {
        // TODO Auto-generated method stub
        DatagramSocket ds = new DatagramSocket(1234);

        byte[] receive = new byte[65535];

        DatagramPacket DpReceive = null;
    }
}

```

```

while (true)
{

    DpReceive = new DatagramPacket(receive,receive.length);
    ds.receive(DpReceive);
    System.out.println("Client Says:-" + data(receive));
    Arrays.fill(receive,(byte)0);
    if (data(receive).toString().equals("bye"))
    {
        System.out.println("Client sent Bye!!EXITING");
        break;
    }

}

ds.close();

}

```

```

public static StringBuilder data(byte[] a)
{
    if (a == null)
        return null;
    StringBuilder r = new StringBuilder();
    int i = 0;

```

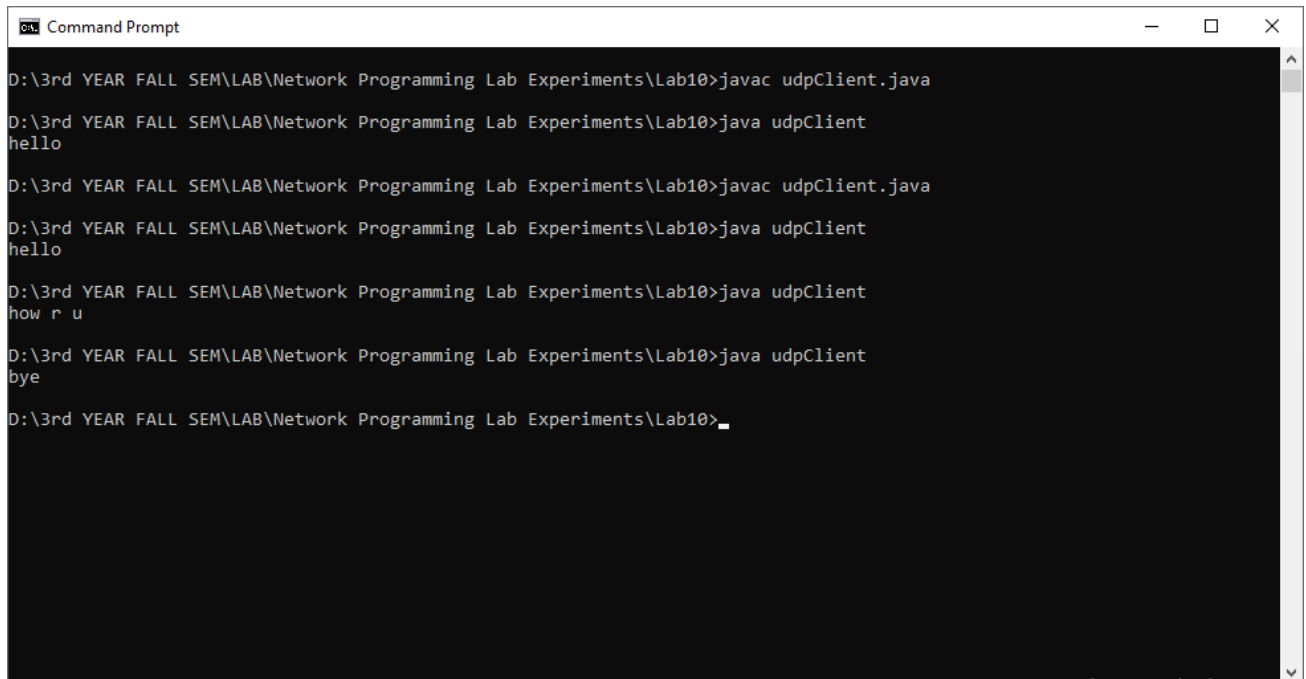

```
        while (a[i] != 0)
        {
            r.append((char)a[i]);

            i++;
        }

        return r;
    }
}
```

## Outputs

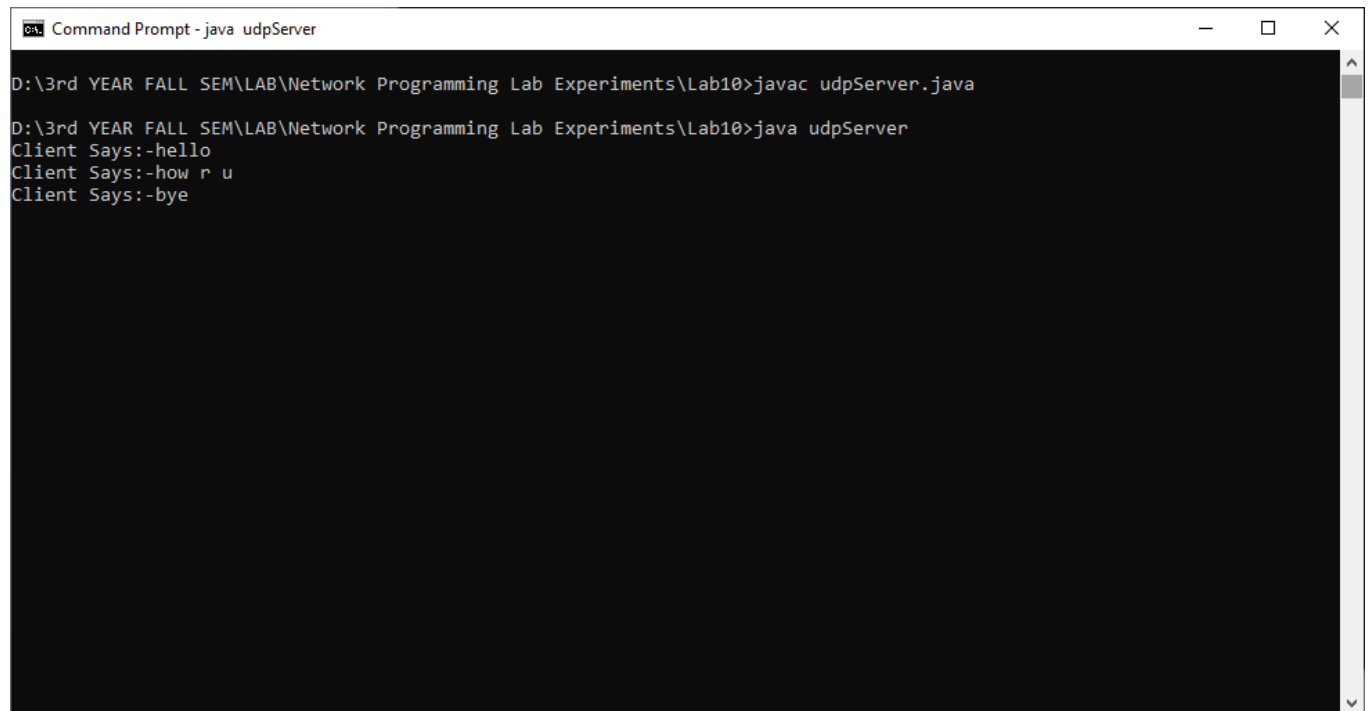

## Client side

```
Command Prompt

D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>javac udpClient.java
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>java udpClient
hello
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>javac udpClient.java
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>java udpClient
hello
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>java udpClient
how r u
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>java udpClient
bye
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>
```

## Server Side

```
Command Prompt - java udpServer

D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>javac udpServer.java
D:\3rd YEAR FALL SEM\LAB\Network Programming Lab Experiments\Lab10>java udpServer
Client Says:-hello
Client Says:-how r u
Client Says:-bye
```
